

DENTAL PUBLIC HEALTH (PBHL)

Courses

PBHL 5011. Advanced Education In Dental Public Health 1. 2 Credit Hours.

This course is designed to provide dental public health (DPH) students with the foundational knowledge about DPH topics and learn to critically review the scientific literature. Students will also develop skills in dental public health practice by applying knowledge in community-based practice and teaching. Through this participation course, DPH students are expected to review the seminal and current literature about a defined topic in dental public health and discuss the topic with a faculty member who is assigned to teach this topic. Students receive experiences in administration, programs, and policy. The DPH student participates to dental public health community service-learning experience and rotations, DPH students acquire knowledge and skills in education focusing on teaching methodologies, scholarship, and educational planning.
